

Список публикаций д.х.н. Артемьева А. В.

1. Petyuk M.Y., Berezin A.S., Gushchin A.L., Bagryanskaya I.Y., Baranov A.Y., Artem'ev A.V. Luminescent Re(I) scorpionates supported by tris(2-pyridyl)phosphine and its derivatives // *Inorganica Chimica Acta* – 2021. – V. 516. – Article number: 120136 (1-7).
2. Davydova M.P., Bagryanskaya I.Y., Bauer I.A., Rakhmanova M.I., Morgalyuk V.P., Brel V.K., Artem'ev A.V. Green-and red-phosphorescent Mn(II) iodide complexes derived from 1,3-bis(diphenylphosphinyl)propane / *Polyhedron*. – 2020. – V. 188. – Article number: 114706 (1-5).
3. Artem'ev A.V., Davydova M.P., Berezin A.S., Samsonenko D.G. Synthesis and Thermochromic Luminescence of Ag(I) Complexes Based on 4,6-Bis(diphenylphosphino)-Pyrimidine // *Inorganics*. – 2020. – V. 8, N 9. – Article number: 46 (1-12).
4. Gushchin A.L., Shmelev N.Y., Malysheva S.F., Artem'ev A.V. Belogorlova N.A., Abramov P.A., Laricheva Y.A., Fomenko I.S., Piryazev D.A., Sheven D.G. Trinuclear M_3S_4 cluster complexes with hemilabile phosphinothioether ligands: Some experimental and theoretical aspects // *Inorganica Chimica Acta* – 2020. – V. 508. – Article number: 119645 (1-8).
5. Davydova M.P., Rakhmanova M.I., Bagryanskaya I.Y., Brylev K.A., Artem'ev A.V. A 1D Coordination Polymer Based on CuI and 2-(Diphenylphosphino)Pyrimidine: Synthesis, Structure and Luminescent Properties // *J. Structur. Chem.* – 2020. – V. 61, N 6. – P. 894-898.
6. Artem'ev A.V., Baranov A.Y., Rakhmanova M.I., Malysheva S.F., Samsonenko D.G. Copper(I) halide polymers derived from tris[2-(pyridin-2-yl)ethyl]phosphine: halogen-tunable colorful luminescence spanning from deep blue to green // *New Journal of Chemistry*. – 2020. – V. 44, N 17. – P. 6916-6922.

7. Artem'ev A.V., Rogovoy M.I., Samsonenko D.G., Rakhmanova M.I. Heterobimetallic Pt-II-Ag-I complex supported by diphenyl(2-pyrimidyl) phosphine: Synthesis and thermochromic photoluminescence // *Inorg. Chem. Commun.* – 2020. – V. 115. - Номер статьи: 107862 (1-4).
8. Davydova M.P., Bauer I.A., Brel V.K., Rakhmanova M.I., Bagryanskaya I.Y., Artem'ev A.V. Manganese(II) Thiocyanate Complexes with Bis(phosphine Oxide) Ligands: Synthesis and Excitation Wavelength-Dependent Multicolor Luminescence // *Eur. J. Inorg. Chem.* – 2020. – V. 2020, N 8. – P. 695-703.
9. Baranov A.Yu, Rakhmanova M.I., Samsonenko D.G., Malysheva S.F., Belogorlova N.A., Bagryanskaya I.Yu., Fedin V.P., Artem'ev A.V. Silver(I) and gold(I) complexes with tris[2-(2-pyridyl)ethyl]-phosphine // *Inorganica Chimica Acta* - 2019. – V. 494. – P. 78–83.
10. Artem'ev A.V., Pritchina E.A., Rakhmanova M.I., Gritsan N.P., Bagryanskaya I.Y., Malysheva S.F., Belogorlova N.A. Alkyl-dependent self-assembly of the first red-emitting zwitterionic $\{Cu_4I_6\}$ clusters from $[alkyl-P(2-Py)_3]^+$ salts and CuI: when size matters // *Dalton Transactions.* – 2019. – V. 48. – N. 7. – P. 2328-2337.
11. Artem'ev A.V., Doronina E.P., Rakhmanova M.I., Tarasova O.A., Bagryanskaya I.Yu., Nedolya N.A. Chemoselective mechanochemical route toward a bright TADF-emitting CuI-based coordination polymer // *Inorganic Chemistry Frontiers.* – 2019. – V. 6. – N 3. – P. 671-679.
12. Artem'ev A.V., Ryzhikov M.R., Taidakov I.V., Rakhmanova M.I., Varaksina E.A., Bagryanskaya I.Yu., Malysheva S.F., Belogorlova N.A. Bright green-to-yellow emitting Cu(I) complexes based on bis(2-pyridyl)phosphine oxides: synthesis, structure and effective thermally activated-delayed fluorescence // *Dalton Transactions.* – 2018. – V. 47. – N 8. – P. 2701-2710.
13. Gushchin A.L., Shmelev N.Y., Malysheva S.F., Artem'ev A.V., Belogorlova N.A., Abramov P.A., Kompan'kov N.B., Manoury E., Poli R., Sheven D.G., Llusare R., Sokolov M.N. Hemilability of phosphine-thioether ligands coordinated to trinuclear Mo_3S_4 clusters and its effect on hydrogenation catalysis // *New Journal of Chemistry.* – 2018. – V. 42. – N 21. – P. 17708-17717.

14. Artem'ev A.V., Kashevskii A.V., Bogomyakov A.S., Safronov A.Yu., Sutyryna A.O., Telezhkin A.A., Sterkhova I.V. Variable coordination of tris(2-pyridyl)phosphine and its oxide toward $M(\text{hfac})_2$: a metal-specifiable switching between the formation of mono- and bis-scorpionate complexes // Dalton Trans. – 2017. – V. 46. – P. 5965-5975.
15. Artem'ev A.V., Bagryanskaya I.Yu., Doronina E.P., Tolstoy P.M., Gushchin A.L., Rakhmanova M.I., Ivanov A.Yu., Sutyryna A.O. A new family of clusters containing a silver-centered tetracapped $[\text{Ag}@\text{Ag}_4(\mu^3\text{-P})_4]$ tetrahedron, inscribed within a N_{12} icosahedron // Dalton Trans. – 2017. – V. 46. – P. 12425-12429.
